

## Before you continue to Google Search

Google uses [cookies](#) and data to:

- Deliver and maintain services, like tracking outages and protecting against spam, fraud, and abuse
- Measure audience engagement and site statistics to understand how our services are used

If you agree, we'll also use cookies and data to:

- Improve the quality of our services and develop new ones
- Deliver and measure the effectiveness of ads
- Show personalized content, depending on your settings
- Show personalized or generic ads, depending on your settings, on Google and across the web

For non-personalized content and ads, what you see may be influenced by things like the content you're currently viewing and your location (ad serving is based on general location). Personalized content and ads can be based on those things and your activity like Google searches and videos you watch on YouTube. Personalized content and ads include things like more relevant results and recommendations, a customized YouTube homepage, and ads that are tailored to your interests.

Click "Customize" to review options, including controls to reject the use of cookies for personalization and information about browser-level controls to reject some or all cookies for other uses. You can also visit [g.co/privacytools](https://g.co/privacytools) anytime.

WHAT IS ANOVA REMOTE MONITORING?

Gone are the days of manual inventory checks and usage guesstimates. Anova wirelessly delivers critical data – such as inventory level, pressure, and temperature – via connected industrial sensors and our cloud data platform. Customers are now constantly in touch with their remote assets and can view reports, generate forecasts, set alerts, and plan distribution routes - all online, 24/7, no matter where equipment is located.

# The Anova Difference

## TOP-OF-THE-LINE SENSORS

Leading brands like Endress+Hauser, WIKA, and Rochester

## MULTIPLE COMMUNICATION TECHNOLOGIES

2G, 3G, LTE cellular, satellite, NB-IoT, LoRa

## GLOBAL TECH SUPPORT

Service in different languages and local time zones.

## DEPLOYMENT

Customer analysis and maximize R

// We installed monitors on cylinder fuel stations and reduced our deliveries by 50% to those tanks. Before we were making trips once a week to check and top them off. Now we go about every other week.

River Valley Coop
